COUNCIL AGENDA REPORT

TO: City Council
FROM: City Manager
Prepared by: Director of Public Works/City Engineer

SUBJECT: PROPOSED ESTABLISHMENT OF A NO-STOPPING ZONE ON EAST BOONE STREET PURSUANT TO SECTION 7-5.16 OF THE SANTA MARIA MUNICIPAL CODE

RECOMMENDATION:
That the City Council adopt a resolution to implement a no-stopping zone on a portion of East Boone Street.

BACKGROUND:
A resident of the newly constructed Hancock Terrace multi-family residential development contacted the City expressing a sight distance concern at a driveway on East Boone Street. There is a lack of sight distance for vehicles leaving Hancock Terrace when large vehicles are parked adjacent to the driveway. Seeking to improve sight distance at the driveway, the resident requested no parking east of the driveway for fifteen (15) feet, as shown on Attachment A.

DISCUSSION:
A field visit to the driveway confirmed large vehicles parked near the eastside of the driveway limited sight distance for viewing westbound traffic on East Boone Street. The proposed establishment of a no-stopping zone on East Boone Street will improve the sight distance. The property owner and on-site property management have been contacted, and they are supportive of the proposed no-stopping zone.

The Traffic Committee has reviewed the request and recommends that the City Council establish the proposed no-stopping zone to improve sight distance for viewing traffic on East Boone Street.

The City Council has the authority to locate and designate certain areas within the City as “No-Stopping” zones, per the Santa Maria Municipal Code Section 7-5.16.

Fiscal Considerations
The proposed no-stopping zone will require the installation of painted red curb. The Public Works Department has estimated the improvements to cost approximately $50.

Impact to the Community
The no-stopping zone will result in the loss of one parking space.
Other Agency Review
None.
